**Lassen Municipal Utility District
Attn: Energy Efficiency Rebates
65 South Roop Street
Susanville, CA. 96130**

Please allow 8-10 weeks for processing.

Call 530-257-4174 to inquire about this or other energy efficiency programs

The implementation of your Energy Efficient project(s) may require City or County building permits. Before beginning your project please check with the Building and Planning Division at (530) 257-1000 (City) and 530-251-8269.

Making sure you get as much light output as you need:

Light output from a bulb is measured in "lumens." When you're shopping for a compact fluorescent Bulb "CFL" to replace a standard bulb, find the bulb you normally buy and find the lumen output rating on the package. Then go to the CFL bulbs and find one that has a similar lumen output. Use the table below to help you choose the right bulb.

How do I know which CFL to buy?

The least expensive CFL may not be the best buy. Customers often find that more expensive bulbs last longer than cheaper ones. Be sure to look over the package carefully before you buy. The packaging should indicate where the bulb will perform up to your expectations. For example, the packaging should indicate whether the bulb is suitable for enclosed fixtures, cold locations, or damp locations. With a few exceptions, CFL's should not be used with dimmers, occupancy sensors, or photocells unless they are specifically rated for those uses.

"Regular Bulb" Watts	Equivalent Compact Fluorescent ("CFL") Watts
60	14-17
75	18-21
90	22-23
100	24-26
150	35-40
